

Babies at the hospital

Name _____ Date _____

On Monday morning some babies were born.
The nurse weighed the babies and wrote it
on a chart.

Time	Baby	weight
09:30	Hassan	3 Kg
10:15	Lucy	5kg
11:00	Pat	4kg
12:30	Sima	2kg

- 1 How many babies were born on Monday morning?
- 2 Which baby was born before 10.00 am?
- 3 Which baby is the heaviest? _____
- 4 Which baby is the lightest? _____
- 5 Which baby was born last? _____
- 6 Which baby was born first? _____
- 7 What is the weight of Hassan and Lucy together?
- 8 What is the weight of Pat and Lucy together?
- 9 What is the difference between the heaviest and the lightest baby?
- 10 Hassan's weight is less than Lucy's. What is the difference?
- 11 Write the names of the babies in order from heaviest to lightest.

12 Complete the sentences about the babies using these words: *heaviest, lightest*.

Sima is the _____ baby.

Lucy is the _____ baby.

Babies at the hospital

Name _____ Date _____

Look at these babies

Hassan

Lucy

Pat

Sima

13 Write about the three babies using these words: *large, larger than, largest, small, smaller than, smallest*. One sentence is done for you.

Lucy is bigger than Hassan.

14 Match the babies to the correct cot.

A _____

B _____

C _____

D _____

15 Write about the cots, using these words: *shorter than, shortest, taller than, tallest, longer than, longest*

Cot A is taller than cot B.

Babies at the hospital

Name _____ Date _____

16 Here are some baby bottles.

Mark them: *empty, full and half full*

X

Y

Z

17 Write about the bottles using these words: *holds more than, holds less than*

A

B

C

Bottle A holds more than bottle C.

18 How many baby bottles are there?

19 The nurse takes **four** bottles to feed some babies. How many are left?

20 How many cots are there?

21 The nurse takes away **three** nappies to change some babies. How many are left?

22 A nurse adds **two** more bottles. How many are there now?

E1 Babies at the hospital

Curriculum mapping

Functional Skills Mathematics mapping – coverage and range statements

This resource is ideal for underpinning many Functional Maths coverage and range statements – particularly at Entry Level 3. However, in Functional Maths exams **it is the process skills that are assessed; these are key to successful Functional Maths teaching and learning and must always be developed and stressed during teaching (see next page).**

Coverage and range statements provide an indication of the type of mathematical content candidates are expected to apply in functional contexts. Relevant content can also be drawn from equivalent National Curriculum levels and the Adult Numeracy standards.

✓ indicates the main coverage and range skills covered in this resource, although these will vary with the student group and how the resource is used by the teacher.

Entry Level 1

- | | |
|--|---|
| a) understand and use numbers with one significant figure in practical contexts ✓ | c) describe position |
| b) describe the properties of size and measure, including length, width, height and weight, and make simple comparisons. ✓ | d) recognise and select coins and notes |
| | e) recognise and name common 2D and 3D shapes |
| | f) sort and classify objects practically using a single criterion ✓ |

Entry Level 2

- | | |
|--|---|
| a) understand and use whole numbers with up to two significant figures | e) recognise sequences of numbers, including odd and even numbers |
| b) understand and use addition/subtraction in practical situations ✓ | f) use simple scales and measure to the nearest labelled division |
| c) use doubling and halving in practical situations | g) know properties of simple 2D and 3D shapes |
| d) recognise and use familiar measures, including time and money. ✓ | h) extract information from simple lists |

Entry Level 3

- | | |
|--|---|
| a) add and subtract using three-digit numbers | g) recognise and describe number patterns |
| b) solve practical problems involving multiplication and division by 2, 3, 4, 5 and 10 | h) complete simple calculations involving money and measures |
| c) round to the nearest 10 or 100 | i) recognise and name simple 2D and 3D shapes and their properties |
| d) understand and use simple fractions | j) use metric units in everyday situations |
| e) understand, estimate, measure and compare length, capacity, weight and temperature | k) extract, use and compare information from lists, tables, simple charts and simple graphs |
| f) understand decimals to two decimal places in practical contexts | |

FUNCTIONAL MATHEMATICS PROCESS SKILLS and SKILL STANDARDS (SS)				 Skillsworkshop tips  tip that works well with this resource To develop this skill, encourage learners to:
Process Skills (all levels)	Entry 1 SS	Entry 2 SS	Entry 3 SS	
Representing <i>Selecting the mathematics and information to model a situation</i>				Represent <ul style="list-style-type: none"> Highlight information they need and/or cross out unneeded information / pictures/ words.  Arrange or reorganise given or selected information as needed e.g. in a table or list. Show all their working out.(e.g. simple lines drawn on paper to compare lengths, to help add up, etc. 
<ul style="list-style-type: none"> Recognise that a situation has aspects that can be represented using mathematics Make an initial model of a situation using suitable forms of representation Decide on the methods, operations and tools, including ICT, to use in a situation Select the mathematical information to use 	<ul style="list-style-type: none"> Understand simple mathematical information in familiar contexts and situations 	<ul style="list-style-type: none"> Understand simple practical problems in familiar contexts and situations Select basic mathematics to obtain answers 	<ul style="list-style-type: none"> Understand practical problems in familiar contexts and situations Begin to develop own strategies for solving simple problems Select mathematics to obtain answers to simple given practical problems that are clear and routine 	
Analysing <i>Processing and using mathematics</i>				
<ul style="list-style-type: none"> Use appropriate mathematical procedures Examine patterns and relationships Change values and assumptions or adjust relationships to see the effects on answers in models Find results and solutions 	<ul style="list-style-type: none"> Use mathematics to obtain answers to simple given practical problems that are clear and routine Generate results that make sense for a specified task 	<ul style="list-style-type: none"> Use basic mathematics to obtain answers to simple given practical problems that are clear and routine Generate results to a given level of accuracy use given checking procedures 	<ul style="list-style-type: none"> Apply mathematics to obtain answers to simple given practical problems that are clear and routine Use simple checking procedures 	Analyse <ul style="list-style-type: none"> Check all their calculations or procedures and show proof that they have done so. <i>E.g. a simple tick in a different colour to show they have re-checked their answers.</i>  Investigate other options / situations. Create new questions about given information and try them out on others.  Mark each other's work. 
Interpreting <i>Interpreting and communicating the results of the analysis</i>				
<ul style="list-style-type: none"> Interpret results and solutions Draw conclusions in light of situations Consider the appropriateness and accuracy of results and conclusions Choose appropriate language and forms of presentation to communicate results and solutions 	<ul style="list-style-type: none"> Provide solutions to simple given practical problems in familiar contexts and situations 	<ul style="list-style-type: none"> Describe solutions to simple given practical problems in familiar contexts and situations 	<ul style="list-style-type: none"> Interpret and communicate solutions to practical problems in familiar contexts and situations 	Interpret <ul style="list-style-type: none"> Draw conclusions. Discuss and justify their choice of method and their answer. Explain their answers and conclusions to others – verbally  and in writing.
