## Number Words

In cheques and other documents you will need to write numbers as words. One reason for this is that if writing is smudged or gets wet numbers they can look very similar when written as digits. Your bank manager could end up giving you £80 instead of £60!

Spelling number words can be tricky.

**Remember - Use ALL of your senses.**

### See

Trace over the words at least five times.

Draw around the words, to find the shape they make on the page. Where do they rise? Where do they fall? How long are they?

### Feel

Draw out the shape of each word using your finger-tip on the desk.

### Say

Sound out the letters as you write.

### Hear

Get your teacher to tell you the letters for each word out loud as you trace them.

### Practice

Make yourself flashcards with the numbers on one side, and their matching words on the other, in both capital and lowercase (little) letters, and in a variety of fonts.

1. Line up the cards, 'word' side up, and write the matching number on a sheet of paper. Turn the cards over and see if you were right.
2. When you are more confident, repeat this with the numbers face up, and see if you can write the matching words.

### Type up your number words on the computer

Write the words out in capital letters and lowercase letters.

Copy and paste the words, changing the font each time.

Draw lines to connect each word with the number and correct amount of dots.

one	two	three	four
-----	-----	-------	------

**	*	****	**
----	---	------	----

3	2	1	4
---	---	---	---

Trace over each word and say its name out loud.
