

# Wallace and Gromit

## Warm-up exercise

A new Wallace and Gromit animated film is in production.

The film is to be 1 hour and 15 minutes long.

3 seconds of film a day are produced.

The film crew take no week-ends or holidays.

### With a partner

- Using the whiteboard, write a set of instructions, plan or flow chart to describe how to work out how long it will take to complete the film (do not include any calculations).
- Using rounding, make an estimate of how long will it take to finish the film (in years).
- Make an accurate calculation of how long will it take to finish the film (in years and days).
- Compare your answer to your estimate.
