

# Temperature recording sheet

Use the thermometer on your forehead. Ask the person next to you to read off your temperature from the strip.  
Then, you read your partner's temperature.

## Record your results here

Your temperature \_\_\_\_\_

His or her temperature \_\_\_\_\_

What is the normal body temperature? \_\_\_\_\_

What would happen if you put the thermometer on different parts of your body?

Would the reading be the same or different?

Read off your results and record them here.

Leg \_\_\_\_\_

Arm \_\_\_\_\_

Wrist \_\_\_\_\_

How much do you think your temperature has to rise before you feel ill?
